

BHAVYA PARVATHI

Cybersecurity Professional | SOC Analyst | Blue Team & Threat Detection
(+91) 9949589677 • bhavyanagasai@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFILE SUMMARY

Cybersecurity professional transitioning from M.Tech Engineering with hands-on SOC fundamentals including phishing investigation, log analysis, threat detection, and SIEM operations. Holds ISC² CC, Google Cybersecurity, and CAISR certifications. Background in structured technical report writing and system analysis. Targeting SOC Analyst and entry-level Blue Team roles.

TECHNICAL SKILLS

SOC / Ops	Splunk (SIEM), Log Analysis, Incident Response, Threat Detection, Phishing Investigation, VirusTotal
Pen Testing	Burp Suite, OWASP ZAP, OWASP Top 10 & API Top 10, SQLi, XSS, CSRF, IDOR, Auth Bypass, CVSS
API Security	REST, OAuth 2.0, JWT, Postman, Wallarm methodology, BOLA, Broken Auth, Input Validation
Network Sec	Wireshark, Nmap (NSE), UFW/iptables, VirtualBox lab, TCP/IP, DNS, IDS/IPS, Recon-ng, OpenVAS
GRC & Privacy	DPDPA 2023, Risk Assessment, Security Policy Drafting, Compliance Mapping
Scripting & OS	Python (basic), Bash, Kali Linux, Ubuntu, Windows Security

CERTIFICATIONS

Certified in Cybersecurity (CC)	ISC ²	Dec 2025
CAISR – Adversarial Recon & Red Team Methodology	Red Team Leaders	Mar 2026
API Security Certified Associate	Wallarm	Mar 2026
DPDPA 2023 Certification	DPDPA Certification Body	Feb 2026
Google Cybersecurity Professional Certificate	Google / Coursera	Sep 2025
CEH – Certified Ethical Hacker (in progress)	EC-Council	Expected 2026

EXPERIENCE

Cybersecurity Intern | Redynox 2025 (1 Month)

Tools: Burp Suite, OWASP ZAP, WebGoat, Wireshark, UFW/iptables, VirtualBox, Kali Linux

- Monitored and triaged web application security findings on OWASP WebGoat; documented SQLi, Reflected/Stored XSS, and CSRF vulnerabilities mapped to OWASP Top 10 with full PoC, root-cause analysis, and remediation recommendations.
- Configured and maintained a VirtualBox lab environment (Ubuntu router + Kali Linux client); set up IP forwarding, NAT, iptables, and UFW firewall rules to simulate a segmented network for controlled testing.
- Captured and analysed live DNS/ICMP/TCP traffic in Wireshark to identify anomalous patterns; escalated findings with structured reports covering input sanitisation, parameterised queries, SameSite cookies, CSRF tokens, and network segmentation controls.

PROJECTS

Network Recon & Phishing Investigation | Independent Research Dec 2025

Tools: Nmap (NSE), Recon-ng, OpenVAS, VirusTotal, MXToolbox

- Mapped 12 open services and 3 exposed ports via end-to-end footprinting; flagged 4 exploitable vulnerabilities with risk ratings and recommended remediation steps.

- Analysed 10+ phishing emails — identified spoofed domains, DKIM/SPF failures, and malicious redirects; documented IOCs and recommended mail gateway rules to block similar threats.

OWASP Juice Shop — Vulnerability Assessment | Independent Research

Feb 2026

Tools: Burp Suite, Kali Linux | Target: Juice Shop v19.1.1

- Identified and exploited 5 vulnerabilities: Authentication Bypass (admin login via Burp Suite payload modification), IDOR (basketId manipulation causing horizontal privilege escalation), Sensitive Endpoint Exposure (/score-board unauthenticated access), DOM XSS, and Filter Bypass XSS.
- Documented all findings with PoC steps, impact analysis (session hijacking, cookie theft, data exfiltration risk), and OWASP Top 10 mapping; produced a formal VAPT-style report demonstrating readiness for real client engagements.

API & Web Application Penetration Testing | Independent Research

Mar 2026

Tools: Burp Suite, Postman, OWASP ZAP

- Performed black-box assessment of a test web app and REST APIs; identified 5 vulnerabilities including BOLA, improper authentication, and input validation flaws (2 rated High severity).
- Mapped attack paths to detection opportunities, identified log sources and alert conditions that would surface each exploit in a SIEM environment; delivered full VAPT report with CVSS ratings and remediation steps.

ACHIEVEMENTS & KEY STRENGTHS

5+ certifications earned independently within 12 months • Trilingual: Telugu, Hindi, English • Clear technical communicator: produces structured VAPT reports for both technical and non-technical stakeholders • Systems-thinking mindset from M.Tech engineering background • Gold Medal, State Level Hindi Talent Test, Andhra Pradesh (2016).

EDUCATION

M.Tech — Structural Engineering | Aditya Engineering College (A), Kakinada

2022 – 2024

CGPA: 8.67

B.Tech — Civil Engineering | Aditya Engineering College (A), Kakinada

2018 – 2022

CGPA: 8.21
